

METHOD AND SYSTEM FOR
BENEFICIATION OF GASIFICATION SLAG

ABSTRACT OF THE DISCLOSURE

The present invention provides a method of beneficiating slag, including mixing the slag with water to form a slurry. The slurry is screened through a first screen to remove a first portion of material and then screened through a second screen to remove a second portion of material. In one embodiment, the second portion of material has a carbon content less than about 5% and, more preferably, a carbon content less than about 1%.
